

JLM Hydraulic Valve Lifter Treatment

The JLM Hydraulic Valve Lifter Treatment is an oil additive designed to improve the performance and functionality of a car engine's hydraulic valve lifters. These lifters are responsible for maintaining proper contact between the camshaft and the valves, ensuring smooth engine operation. Over time, deposits and sludge can accumulate within the lifters, causing noise and reduced performance. The JLM Hydraulic Valve Lifter Treatment is formulated to dissolve these deposits, enhancing the lifter's ability to function correctly. By using this treatment, car owners can potentially reduce valve noise, restore lost power, and extend the overall lifespan of their engine.

Benefits

- Dissolves dirt, gum and varnish deposits in the oil system
- Releases and lubricates sticking valve stems and hydraulic valve lifters
- Restores lost power
- Restores efficient working of hydraulic valve lifters
- Reduces valve train noise

How to use:

Recommended for all petrol and diesel engines with or without turbochargers. Compatible with mineral and synthetic engine oils. Safe for use with catalytic converters.

Shake well before use. Add contents of one bottle to the warm motor oil, preferably shortly after oil change. Make sure the oil contents do not exceed the maximum oil level in your engine.

One bottle treats a crankcase of 3 to 6 litres

Product information

Art. Nr: J06070

Barcode: 8718274351910

HS code : 27101981

Ufi Code : 54TH-U03T-700Y-WXN7

Pack Size : 250ml

Quantity in box: 12

Weight full box: 360 gram

Boiling point: No data available

Density at 15 °C: 897.7 g/cm³

Flash point: > 201 °C

Colour: Brown

Odour: Characteristic
